

Get Set for Life

Good to be me

We will be looking at exploring our emotions and being able to talk about them. We will celebrate neuro diversity week and also look at ways in which we can help and support people with dementia.

English

We will study The Rainbow Dragon to learn the features of information texts. We will research, organise facts and write our own engaging information texts using clear structure, technical vocabulary and descriptive language.

Maths

We will develop our understanding of coordinates by plotting and interpreting points on grids, alongside building confidence with fractions through comparing, ordering and solving problems involving parts of a whole.

PE

Gymnastics

We will be refining our skills in gymnastic, working on balance and control.

Geography

Spain

We will compare Liverpool with a region in Spain, exploring similarities and differences in climate, landscape, culture and daily life. We will use maps and geographical skills to investigate how locations within Europe can differ and what makes each place unique.

YEAR 4 – Spring 2

Computing

Media

We will continue to develop our digital skills by creating and presenting information using technology. We will learn how to organise and present content clearly, use images and text effectively, and apply basic editing and formatting skills to improve their work.

Art

Kandinsky

We will use and develop the skills of using abstract shapes to represent people and objects. We will then also explore how colours can represent our emotions.

RE

Desert to Garden

We will explore the themes of Lent, including forgiveness, reconciliation and how devotion to God inspires people to do good works. Through studying Holy Week in St Matthew's Gospel and exploring parables, we will learn about Jesus as the servant Messiah and reflect on the meaning of Lent in our own lives.

Spanish

We will be learning how to describe animals and their home environments. We will further develop our vocabulary to include different habitats.

Science

Living Things and Their Habitats

Throughout this topic, we will be using and developing classification keys. We will look at how animals' features are both similar and different. We will also be looking at living things which live within our own environment.

Music

We will continue to work with Resonate Music Hub in order to further our guitar skills.
